1 Introduction

Elcom Systems is a trading company of Elcom International Inc., a leading global provider of remotely-hosted automated procurement and electronic marketplace systems with over twenty years experience in electronic commerce. Elcom offers the most cost-effective remotely-hosted eProcurement solution available today and with clients in the UK, Serbia, South Africa and US, provides purchasing solutions for the world's largest public sector eProcurement contract. For more information please contact <http://www.elcom.com>.

PECOS P2P and related applications and services are delivered to end users as web based applications. This document provides details of the browsers and associated technologies that Elcom certifies as being supported.

Applications work with the vast majority of current browsers which are certified at the time of release of each product version. Elcom's policy is to support the most current version as well as the previous version of internet browsers available. The current version has been additionally certified (see below).

2 Web Browsers

PECOS v16.0 is designed to work with the latest versions of all the major internet browsers. They have been tested and are certified for the following versions.

Web Browsers	Windows	Linux	Mac
Microsoft Internet Explorer	11.253.17763.0	Not Supported	Not Supported
Edge (Windows 10 only)	44.17763.1.0 (64 bit)	Not Applicable	Not Applicable
Google Chrome	72.0.3626.81 (64 bit)	Not Supported	Not Supported
Mozilla Firefox	65.0 (32-bit)	52.x	65.0 (64-bit)
Safari	Not Supported	Not Applicable	10.1.2
Adobe PDF Reader	8.x; 9.x; 10.0; 11.0	Not Applicable	Not Supported

Note that when using on-line help on MAC Safari, the 'Search' is not displayed.

It should be noted that some browsers are no longer supported by the providers (e.g. Microsoft IE version 6 Sp1) and some platform support has been ended (e.g. Chrome for Windows XP and Vista) but nevertheless Elcom will endeavour to support older technology but may not be able to recreate issues or provide fixes.

Java: PECOS P2P does not require Java.

SSL: All web browsers must support https://.

Cookies: It is recommended that session cookies be enabled in user's browsers when accessing PunchOut sites.

Adobe: Some objects in the system are rendered as Adobe Acrobat PDF files and the latest version of Adobe Acrobat Reader is recommended. A minimum of version 6.0 to view Purchase Orders and exported reports is required. The current version of Adobe Reader is available to download free from: www.adobe.com.

3 Mobile Devices

PECOS v16.0 can be used on most of the tablet computers but at the present time none are certified.

PECOS is an information rich application and many of its screens complex: display on Smartphone browsers may not therefore be suitable. **PECOS-Mobile** is a new set of web pages developed for use specifically on major Smartphone web browsers. The following major operating systems have been tested for use:

- iOS: 9.3.5
- Android: 4.2.2

4 Hardware

It is expected that the latest hardware platform that is recommended for the chosen browser should be used.
